Mackensie Jack
Software Engineer

SUMMARY

Creative, motivated software engineer with an interest in game design and a previous background in art, customer service, self-employment, and social media. Have a library of full stack web apps as well as Agile team and freelancing experience. Looking to bring my skills to a team where I can contribute to a meaningful and widely used product.

To learn more about me I recommend my portfolio site, which showcases my art as well!

RELEVANT EXPERIENCE

Software Engineer Intern at 100Devs

December 2022 — Present

- Collaborate with several teams of developers to build responsive web applications
- Build semantically structured full-stack web applications
- Apply Agile methodologies like SCRUM for project management

Recent Projects:

Fullstack Nest - A developer tool suite that makes the workflow simpler, provides visual and simplistic definitions for width/height values, , color-sets, and other bits of Tailwind documentation. Another tool provides a UI for developing Tailwind gradients visually and copying class names easily, all with React.

The Hyrule Compendium Game Guide - User enters a query to access the Hyrule Compendium API. Is a quick access and well-designed digital game guide for Breath of the Wild.

Secondhand - A social site for sharing gently used goods for free under the Buy Nothing Project, centralizing the movement instead of spreading it across Facebook groups. Features accounts, messages, posts, feed, likes, comments.

WORK EXPERIENCE

Consultation Agent at Best Buy

March 2022 – Present

- Accurately diagnose technology issues, engaging with client, leaving detailed notes for repair technicians or solving the issue during appointment via many different means depending on unique problem.
- Help set up, troubleshoot, and repair devices (hardware and software related)
- Monitor service queues and provide status updates to clients
- Clearly communicate with team

Freelance Artist | Luna Moth Dolls | Albany, NY

June 2017 — March 2020

I worked as an independent artist, running a successful online business where I offered commissions for artist dolls.

- Fiber-crafting, sewing, painting, and sculpting to accommodate the needs of my clients
- SEO, social media marketing, branding, business personality and rapport
- Maintained a Shopify website, HTML/CSS that increased my sales twice over upon launching
